Cockpit Care and Milk

Weicar Cocpit Care Milk Spray is a superior care product specifically developed for plastic and rubber surfaces in your vehicle's interior. Its innovative formula leaves no greasy feeling or residue, deeply renewing surfaces and restoring a natural shine. It revitalizes your vehicle's interior colors, restoring its original aesthetic appearance. Refreshes textured or smooth plastic surfaces on glove compartment lids without leaving a greasy layer that attracts dust.

Areas of Use: Protects dashboards and instrument panels against UV damage, fading, and cracking caused by direct sunlight. Renews the color and texture of plastic and vinyl door trims, adding depth. Creates a dust-resistant, natural, and matte/satin finish on plastic cup holders, storage compartments, and gearshift areas.

Net Weight	980gr
Gross Weight	1030gr
Volume	1000ml
Package	12pcs
Pallet	1600pcs
Pallet Dim	100x120x215h
Shape	Bottle HDPE
Barcode(EAN)	0700343204034

Directions for Use: Shake the bottle well before use. For best results, ensure the surface is completely dry before application by wiping away heavy dust and dirt with a damp cloth or a suitable general cleaner. To avoid splashing onto glass or unwanted areas, instead of spraying the product directly onto the surface, apply a sufficient amount to a clean, dry microfiber cloth or application sponge. Apply the product evenly to plastic, rubber, or vinyl surfaces using light circular motions. You can use a detail brush for hard-to-reach areas and ventilation grilles.

Hazard Pictograms:

Storage Conditions: Store in cool and ventilated area. Recommended storage temperature: 15 - 30 °C. Keep out of reach of children.
