Art No: WC-ECS500

Waterless Engine Cleaner Spray

Weicar Waterless Engine Cleaner is a high-performance product developed to quickly dissolve thermal oil, grease, and stubborn, layered dirt that accumulates over time on engine blocks, transmission housings, and mechanical parts. It does not damage plastic components, radiator hoses, or rubber fittings in the engine compartment; it optimizes the engine's heat transfer.

Areas of Use: It quickly penetrates and effortlessly dissolves heavy oil, grease, and stubborn, layered dirt on the engine block and components. It easily penetrates lower housing blocks, providing deep cleaning and a renewed appearance.

Net Weight	342gr
Gross Weight	430gr
Volume	500ml
Package	24pcs
Pallet	1920pcs
Pallet Dim	100x120x215h
Shape	Aerosol Can
Barcode(EAN)	0700343203747

Directions for Use: Shake the can well before application. Ensure electrical components such as the battery, distributor, and alternator are completely sealed/insulated to protect them from water and liquid contact. Spray the product onto the cold or warm engine surface from a distance of approximately 20 cm. (Never apply to a hot engine). Allow the product to penetrate and dissolve the dirt, allowing it to wash away from the surface. For heavily soiled areas, you can repeat the process.
Technical Note: Absolutely do not apply to a hot engine. Never start the engine until it is completely dry.

Hazard Pictograms:

Storage Conditions: Store in cool and ventilated area. Recommended storage temperature: 15 - 30 °C. Keep out of reach of children.
